Bill4Time 2016 Year in Review!

2016-4

With 2016 coming to a close, we can reflect on the past year and look forward to the future!

Throughout this year, we have a released many updates including a new design!

Here is a list of features released in 2016 just in case you missed them!

Monthly Productivity Report – The Monthly Productivity report will show billable and non-billable hours and amounts based on a per user per month format. https://www.bill4time.com/blog/just-released-new-monthly-productivity-report/

Finalize/Unfinalize All Invoices – When invoice batching you have the ability to view, print, and create a pdf of all the invoices in your batch. With this feature, you can choose which invoices you would like to Finalize or Unfinalize all at once instead of individually which saves time and money: https://www.bill4time.com/blog/tips-tricks-new-finalize-allunfinalize-feature/

Invoice Discount Default – Set a default discount to automatically calculate on each client or project. https://www.bill4time.com/blog/just-released-new-invoice-discount-feature/
